DETAILED ACTION

Claim Objections

1. **Claim 25**, are objected to because of the following informalities: **Regarding Claim 25**; the method steps do not assert a control means so as to accomplish the vibration and/or reversed phases. Appropriate correction is required. Note: the claim is otherwise deemed allowable.

Allowable Subject Matter

2. Claim(s) 1-24 are allowed.

The following is an examiner's statement of reasons for allowance: **Regarding Claim 1**;

A gas ejector including at least one vibrator, comprising: a plurality of ejecting sections arranged to eject a pulsating gas flow such that sound waves generated by the vibration of an upper portion of a vibrator and sound waves generated by a lower portion of the vibrator have the same wave form but reversed phases such that the sound waves weaken each other upon ejection from the ejector; and a first control unit which controls the frequency of the vibration of the vibrator. **Regarding Claim 24**; An electronic device including at least one heater and at least one vibrator, comprising: a plurality of ejecting sections arranged to eject a pulsating gas flow such that sound waves generated by the vibration of an upper portion of a vibrator and sound waves generated by a lower portion of [[a]] the vibrator have the same wave form but reversed phases such that the sound waves weaken each other upon ejection from the ejector; and

control means for controlling the frequency of the vibration of the vibrator. **Claim(s) 9, 15, and 19** are allowed (*as indicated in the previous rejection*). Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments filed 2/23/11 have been fully considered and are persuasive. Claims 1-24 are hereby allowed; assuming the English translations of foreign priority documents are submitted and fully supports the instant application. Regarding method claim 25; and objection has been raised; whereas the method steps shall assert a control means in association to the vibrator so as to accomplish the vibration and/or reversed phases.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
